

ASX Announcement

InfoMaster awarded City of Ryde Corporate Management Reporting System tender

8 April 2011

The Board of Sirius Corporation Ltd (ASX:SIU) is pleased to announce that InfoMaster, a wholly owned subsidiary of Sirius Corporation, has been awarded the contract for the development of a Shared Partnership for a Corporate Management Reporting System for the City Of Ryde.

The objective of the tender was to seek proposals from suitable qualified and experienced software development firms to assist council to develop an appropriate Corporate Management Reporting System.

In 2010 the City of Ryde endorsed the development of an Outcomes Framework to support Council's response to the Ryde 2021 Community strategic Plan (CSP). As a result, an integrated business system was required, that would interrogate and report across a range of databases to provide an integrated corporate view and report on the organisations performance in several formats. The City of Ryde, like all NSW Local Governments is required to respond and comply with the new legislation applying to integrated planning and reporting and has selected Category 3 as its option for complying with the legislation and therefore will be required to comply with the legislation from 1 July 2012.

Group Managing Director Mr Frank Licciardello said that "Performance management is critical at the City of Ryde to ensure planned objectives are translated into achieved results. Council required a system which provides an easy to use search, track and reporting mechanism that links plans, measurement and accountability through a single view and InfoMaster was able to provide the solution using its E-services framework and technical know how to meet these requirements and ultimately empower users including staff and the broader community".

InfoMaster will commence the project in April 2011.

Geoff Reeves, General Manager of InfoMaster said "InfoMaster has spent considerable time and effort in building a sound reputation as the leading provider of e-Services solutions across Australia and New Zealand. It is extremely pleasing to see that our efforts are being recognised and further credibility is being built as the solutions provider of choice to the local government community

InfoMaster now has in excess of 80 councils across Australia and New Zealand utilising their award winning eServices software.
