

ASX Announcement

InfoMaster awarded South Australian Department of Water, Land and Biodiversity Conservation Tender

6 May 2009

The Board of Sirius Corporation Ltd (ASX:SIU) is pleased to announce that InfoMaster, a wholly owned subsidiary of Sirius Corporation, has been awarded a competitive tender for the Supply and Implementation of an Asset Management Information Software system to the Government of South Australia, namely the South Australian Department of Water, Land and Biodiversity Conservation. This win follows last month's announcement of a large contract with the Queensland Department of Main Roads, our first State Government contract.

Group Managing Director Mr Frank Licciardello said that this second win to a State Government Department was a major win for InfoMaster in a very competitive market. It also demonstrates how InfoMaster's AssetMaster solution is being accepted in the market as a tool for the management of Local and State Government Infrastructure Assets. It will also assist setting up an important Asset Management footprint into South Australia. In addition to their Asset Management solution, the City of Marion in South Australia has been using InfoMaster's E-Planning solution for some time for Development applications and tracking thereof.

The AssetMaster product that InfoMaster provides is built on a single software platform and delivers a comprehensive view of all asset types across the entire organisation. AssetMaster also provides a clear picture of where cost savings can be made and helps to reduce the total cost of ownership. Its features include financial integration, spatial decision support, and predictive modelling.

InfoMaster expects delivery and installation to commence before June 2009.

The software will assist the Department of Water, Land and Biodiversity Conservation to manage risk and is designed to aid long and short term development of asset and financial management strategies.

The South Australian Department of Water, Land and Biodiversity Conservation will join a growing list of customers such as the City of Melbourne, Central Goldfields Shire Council, Coffs Harbour City Council and Richmond Valley City Council, to name a few, that are already receiving benefits from the use of AssetMaster.
