

ASX Announcement InfoMaster awarded Local Government Association of Tasmania Tender

10 July 2009

The Board of Sirius Corporation Ltd (ASX:SIU) is pleased to announce that InfoMaster, a wholly owned subsidiary of Sirius Corporation, has been awarded the contract for the Development, Enhancement and Implementation of End-to-End Electronic Development Assessment (eDA) Processes to the Local Government Association of Tasmania (LGAT).

LGAT is the peak body for local government in Tasmania and is part of a national network of associations. It is funded by councils and other income earned through projects sponsored on behalf of local government. The body represents and protects the interests, rights and privileges of members of LGAT and fosters and promotes relationships between local government in Tasmania and with the government of Tasmania and the Commonwealth of Australia.

Group Managing Director Mr Frank Licciardello said that "the solution offered to win the tender was InfoMaster's award winning ePlanning software – MasterPlan, {www.infomaster.com.au}. MasterPlan is an online development application tracking and planning application system that allows Local Government Authorities to provide transparency and consistency to their customers by making planning regulation and the development application process available online. The MasterPlan Suite is made up of four inter-related modules; MasterPlan Enquirer, MasterPlan Self Assessor, MasterPlan Applicant and MasterPlan Assessor".

InfoMaster expects to commence the project in July 2009. The solution will be installed in at least two pilot councils: Hobart City Council and Northern Midlands Council (the "participating councils"). Once the solution is installed and accepted the solution is capable of being adopted across other councils in the State of Tasmania.

Geoff Reeves, General Manager of InfoMaster said "InfoMaster has spent considerable time and effort in building a sound reputation as the leading provider of ePlanning solutions across Australia and New Zealand. It is extremely pleasing to see that our efforts are being recognised now at State Government level as well"

InfoMaster now has in excess of 70 councils across Australia and New Zealand utilising their award winning ePlanning software.
