

ASX Announcement

Sirius subsidiary InfoMaster awarded Coffs Harbour City Council Tender

18th September 2007

Sirius Telecommunications Ltd (ASX:SIU) is pleased to announce that InfoMaster, a wholly owned subsidiary of Sirius, has been awarded a competitive tender to supply and implement an integrated Asset Management Software Solution to Coffs Harbour City Council. It is estimated that this contract will derive revenue of over \$400K including maintenance and support income

Group Managing Director Mr Frank Licciardello said this was a major win for InfoMaster as its solution was competing against other renowned larger companies. Being the successful tenderer from a 5 participant tender response process also demonstrates that the AssetMaster solution is now being well accepted in the market as a world-class specialist solution for the management of Local Government Infrastructure Assets.

The solution InfoMaster offered was its AssetMaster product. The product is built on a single software platform and delivers the most comprehensive view of all asset types across the entire enterprise. AssetMaster provides a clear picture of where cost savings can be made and will help to reduce the total cost of ownership. It also features financial integration, spatial decision support, and predictive modelling – features that have been overlooked in many Asset Management systems in the past.

Through the use of AssetMaster Council will be better able to manage assets and align its service levels with available resources enabling it to deliver its services efficiently at sustainable levels. It is expected that the solution will be delivered to council over the next 12-18 months, commencing with some detailed scoping, in the next 30 days.

Coffs Harbour City Council joins a growing list of customers such as City Of Melbourne, Timbercorp, Central Goldfields, and Gold Coast City Council, to name a few, that are currently receiving benefits from the use of this technology.
